

Andrea Frossard

I am the Director of Individual Life Pricing Par at London Life

I was born in San Diego, California, but I lived in Windsor, Ontario for most of my childhood. I graduated with an HBSc in Mathematics from the University of Windsor in 1991. In 1994, I completed my actuarial exams to receive my designation as a Fellow of the Canadian Institute of Actuaries (F.C.I.A.) and a Fellow of the Society of Actuaries (F.S.A.). Since graduating from university, I have worked at London Life in a variety of different actuarial roles (for example in Group Benefits, Reinsurance, Research, and Pricing).

I have two young children who are in their early school years. My volunteer activities include helping with a variety of non-profit organizations, many of which centre on young children. My interests include tennis, fitness and travelling.

VARIETY

I use mathematics every day in my job. Having a mathematical background has provided me with a firm foundation of logical and analytical thinking. It has helped to give me the ability to break down problems and to find solutions to the problems. In my job, I build and use models to help analyze the impact of various possible options, to make better business decisions. When I was in school, I always liked a variety of courses. My job as an actuary allows me the ability to apply mathematical skills to business problems while having a variety of exposure to computer science, business, accounting, law and medicine in my working life.
